\* NOTE.—The largest lamp which will pass through top opening is specified in all cases. Smaller lamps may be used and very satisfactory illumination secured. Write for discounts.

5501

#### PRESENT DAY INSTALLATION OF CAMIA BALLS

Fixtures of a similar type may be had from any fixture manufacturer. We do not sell them.

As an attractive means of illumination a sphere is the peer of any shape.

The CAMIA SPHERE is of a translucent glass. Its absorption by comparison is low, and the fact that the filament of a tungsten lamp is not visible tends to produce a ball of light of uniform intensity.

Being a single-piece sphere, there is no metal band to produce a shadow.

Great care has been taken in its manufacture and, as a sample of the glassmaker's art, it is as nearly a perfect piece of glass as can be produced.

It merits your consideration.
